

# MABI SPEEDY 10

[www.mabi-robotic.com](http://www.mabi-robotic.com)

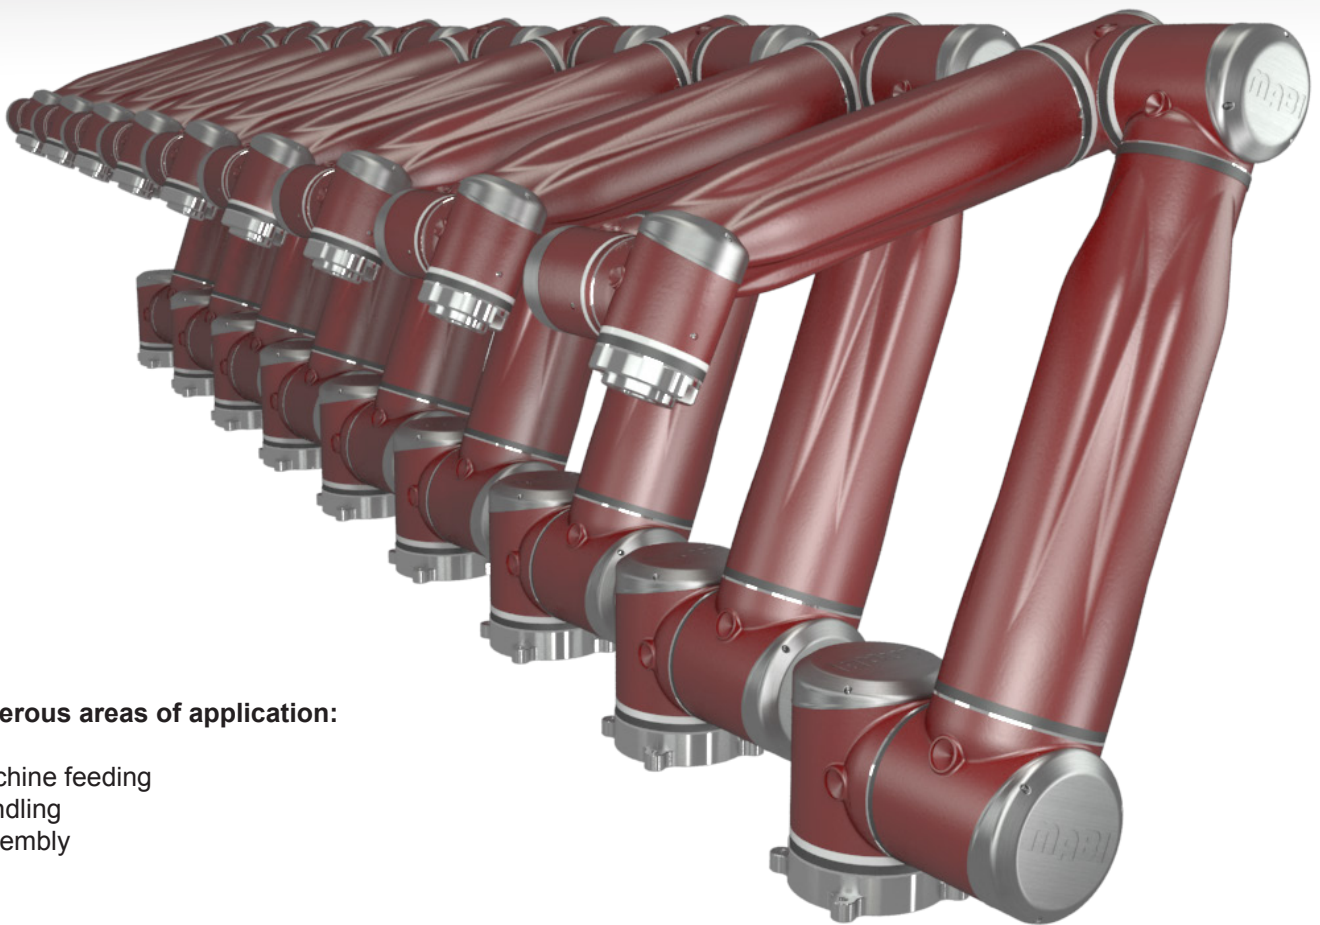

After more than 30 years of experience and global sales in machine construction and automation, we are proud to present to you our own robot series.

SPEEDY 10: The „flexible manufacturing“ often publicised today is the rationale for this development and it is based on a lightweight design with excellent damping characteristics. This 6-axis kinematics system with standard wrist is a lightweight in its class; nonetheless it offers high positioning precision for high-speed applications thanks to a high-resolution absolute feedback encoder.

The robot is controlled through an intuitive graphic user interface which all operators will find easy to learn.

**Numerous areas of application:**

- Machine feeding
- Handling
- Assembly

**Technical specifications:  
[www.mabi-robotic.com](http://www.mabi-robotic.com)**

**Features:**

- Lightweight design
- 6-axis kinematics system with standard wrist
- High-resolution 18-bit absolute encoder
- High positioning precision
- Intuitive graphical user interface

The SPEEDY 10 by MABI Robotic is an extremely flexible six-axis robot. Full engineering and installation at the Veltheim factory in Switzerland – to the usual Swiss standard of quality.
